

U.S. Patent Application Serial No. 10/519,832
Response filed February 13, 2009
Reply to OA dated November 17, 2008

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-5 (canceled).

1 Claim 6 (currently amended): A frozen dessert manufacturing apparatus comprising: a cold
2 storage which cold-stores a liquid containing bag constituted of a bag main body containing a
3 mixture and having flexibility and an outer layer member disposed outside this bag main body,
4 capable of forming a sealed space between the outer layer member and the bag main body, and
5 having flexibility; a cooling cylinder which stirs and cools the mixture supplied from the liquid
6 containing bag to thereby manufacture frozen dessert; a cooling device which cools the cold storage
7 or the cooling cylinder; an air compression device; a mixture supply passage for connecting the
8 inside of the bag main body of the liquid containing bag to the inside of the cooling cylinder; a bag
9 pressurizing passage for supplying compressed air produced by the air compression device between
10 the outer layer member and the bag main body of the liquid containing bag; [[and]] an air supply
11 passage for supplying compressed air into the cooling cylinder; and a combined passage member
12 detachably attached to the cooling cylinder and disconnectably connected to the mixture supply
13 passage and the air supply passage, wherein the mixture supply passage is combined with the air
14 supply passage, and thereafter connected to the inside of the cooling cylinder by the combined

15 passage member, and the combined passage member is disposed in the cold storage.

Claim 7 (canceled).

1 Claim 8 (currently amended): The frozen dessert manufacturing apparatus according to claim
2 [[7]] 6, further comprising: check valves which are connected between the mixture supply passage
3 and the combined passage member and between the air supply passage and the combined passage
4 member and which are in a forward direction on the side of the combined passage member.

Claim 9 (canceled).

1 Claim 10 (currently amended): The frozen dessert manufacturing apparatus according to
2 claim [[4]] 6 or 8, wherein the mixture supply passage is disposed in the cold storage.

Claims 11-18 (canceled).
